

## **SAMARTH RAGGER**

### **FEATURES**

- ◆ Ragger is used with 'D' Hydrapulper machine to remove trash that results from slushing secondary fiber furnish
- ◆ It is supplied with an adjustable fabricated steel base that elevates the ragger to the proper operating height at the side of D Pulper tub Vat.
- ◆ Once positioned, the ragger utilizes the wire that binds the waste paper bales and swirling hydraulic motion of stock being pulped in the tub to form a continuous wire reinforced rope.
- ◆ The rope snags sheet plastic, rags, wet strength paper and other light trash normally encountered in waste paper furnish.
